## Republic of Kalmykia

In the multinational Republic of Kalmykia, one can encounter people belonging to various religions from across the world. Buddhists and Orthodox Christians form the majority of the population. There is a Catholic chapel in Elista, and a mosque located in the Prikumsky settlement of the Chernozemelsky region.

The religious life of society, which had been suppressed during the years of Soviet rule, is steadily being restored. Communities are reopening prayer houses, priesthood traditions are being revived, and temples and churches are actively being reconstructed.

Kalmykia is the only region in Europe where Buddhism is recognized as the official religion. From the 13th to the 17th centuries, this spiritual tradition gradually shaped the cultural identity of the region, bringing influences from Tibetan and Indian civilizations, strengthening unity, and expanding international cultural connections.

By the end of the 16th century and the beginning of the 17th century, Buddhism became the state religion of the Oyrats and Kalmyks.

In many respects, this spiritual heritage has shaped the Kalmyk mentality, lifestyle, and cultural values. Principles such as peacefulness, restraint, meditation, and philosophical depth, cultivated through Buddhism, became defining national characteristics. Until the late 20th century, the priesthood remained an influential force in Kalmykia, preserving the eastern orientation of its political and spiritual life.
